Technologies: SYMFONY 4, MYSQL, ANGULARJS v1, DOCKER AND PHPUNIT

Client: Membertek   **February 2019 - November 2021**
Location: Fleming Island, Florida
Role: Sr Programmer HOME OFFICE

My responsibility in this company was to carry out the tasks that were assigned to me through a system called target process. This system was fed by my bosses on duty who were the people from Texas, among my responsibilities was making changes to the dashboard, making changes to the apis, make cli tools for amazon s3 or send mass emails and changes in landing pages of different clients.

Responsibilities:

- Created modules for user and admin.
- Followed **MVC** architecture Zend Framework for the development.
- Created Web pages using **PHP/MySQL**.
- Working on UI development using **PHP, JavaScript and Wamp.**
- Configured **SQL Server**.
- Developed, Organized and maintained **Dashboard Database MYSQL.**
- Integrate **PHP** into custom templates.
- Designed, Developed, and Maintained Website with **CSS, HTML, DHTML**, and **JavaScript**.
- Hand coded standards compliant, cross-browser compatible **HTML** and **CSS.**
- Created mockups for End User / Business requirement documents.
- Improved the site's look and feel **Web 2.0** with slide-out panels that replaced the older type of pop-up windows to manage related information and improve ease of use.
- Improved site usability by introducing a pull-down menu based on the implementation of AJAX libraries for each of the brands instances.
- Used **JavaScript JQuery** for validations and providing UI effects.
- Designed and implemented additional custom **AJAX/JavaScript** code.
- Extensively used **CSS, HTML**, and JavaScript code for UI development.
- Generated charts using data sources and AJAX calls.

Technologies: PHP, UNIX, MySQL, JavaScript, Vanilla, Docker, JQuery, HTML, AJAX, SQL Server.
